The Ultimate 10 Gbps Connectivity

A True 10G Era

With 2× 10G WAN/LAN autosensing ports, Deco BE95 matches 10G ISP network access. The other port can serve as a wired backhaul between Deco units or be used as a LAN port connection for devices. This way, whether wired or wireless, Deco BE95 delivers the ultimate 10 Gbps connectivity for a true 10G era.

Two 6 GHz Bands for More Backhaul Options

Two 6 GHz bands allow users to use one of them as the dedicated backhaul for stronger backhaul connections. And the rest of the bands, including 6 GHz, 5 GHz, and 2.4 GHz, can be used as open network frequencies for devices.

Highlights

Unrivaled Wi-Fi 7

Deco BE95 features Wi-Fi 7 with the latest 6 GHz band, 320 MHz bandwidth, 4K-QAM, and Multi-RUs for a combined speed of up to 33 Gbps across 16 streams, creating whole home multi-gigabit coverage.

[†]Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput, wireless coverage, and quantity of connected devices are not guaranteed and will vary as a result of network conditions, client limitations, and environmental factors, including building materials, obstacles, volume and density of traffic, and client location. The 160 MHz and 240 MHz bandwidth might not be available on the 5 GHz band, and the 320 MHz bandwidth might not be available on the 6 GHz band in some regions/countries due to regulatory limits on the spectrum, hence the theoretical speeds might vary.

[‡]Clients need to support 802.11k/v/r and may require additional setup. Performance may vary depending on the client device.

[‡]Use of Wi-Fi 7 (802.11be), Wi-Fi 6 (802.11ax), Wi-Fi 6E (802.11ax), and other features including MLO, 320 MHz Bandwidth, 4K-QAM, Multi-RU, OFDMA, MU-MIMO, and BSS Color requires clients to also support the corresponding features. The 320 MHz bandwidth is only available on the 6 GHz band. Not all 320 MHz channels may be available in the 6 GHz band in some regions/countries due to regulatory restrictions.

[§]10 Gbps internet speeds require compatible service plans and equipment. 10 Gbps and 2.5 Gbps ports cannot be concurrently configured as WAN ports.

[°]Use of WPA3 requires clients to also support the corresponding feature.

^{*}HomeShield includes the Free Basic Plan. Fees apply for the Pro Plan. Visit tp-link.com/homeshield for more information.

^{**}Wi-Fi generations represent the wireless standard IEEE 802.11 a/b/g/n/ac/ax/be.

This Deco may not support all the mandatory features as ratified in the IEEE 802.11be specification.

Further software upgrades for feature availability may be required.
