†Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput and wireless coverage, and quantity of connected devices are not guaranteed and will vary as a result of network conditions, client limitations, and environmental factors, including building materials, obstacles, volume and density of traffic, and client location.

‡Clients need to support 802.11k/v and may require additional setup. Performance may vary depending on the client device.

ᴬUse of Wi-Fi 6 and other features including OFDMA, MU-MIMO, 1024-QAM, BSS Color require clients to also support the corresponding features.

Actual network speed may be limited by the rate of the product's Ethernet WAN or LAN port, the rate supported by the network cable, internet service provider factors, and other environmental conditions.
