Omada by tp-link

Datasheet

Omada BE11000(US) / BE9300(EU) Tri-Band Ceiling Mount Wi-Fi 7 Access Point

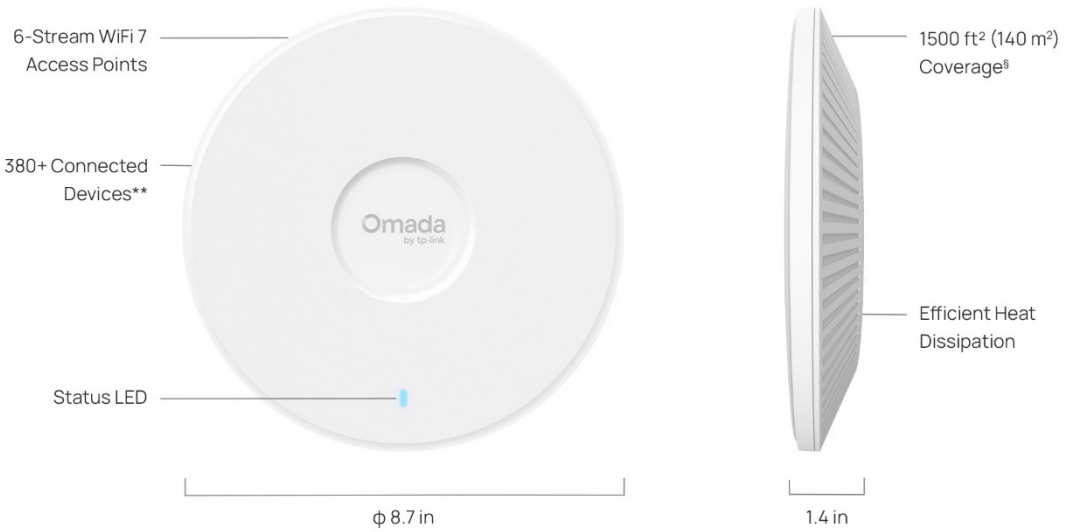
Model: EAP772

Product Overview

Omada EAP772 delivers high-speed, low-latency wireless performance with enhanced multi-user efficiency, meeting the demands of modern businesses.

- 6-Stream Tri-Band Wi-Fi 7: Up to 11.0 Gbps for the US and up to 9.3 Gbps for the EU.†
- Long-Range 6 GHz Coverage with AFC: Unlock stronger signals and wider 6 GHz coverage through AFC.#
- 1× 2.5G Port: Ensures fast connectivity throughout the network.
- Low Latency and Interference: 320MHz Bandwidth, Multi-Link Operation, Multi-Rus, and 4K -QAM ensure high performance of your network.‡
- Flexible Deployment and Easy Setup: Supports both 802.3at PoE and DC Power supply for flexible installation. Omada SDN for one-click setup.
- Advanced Features: Supports centralized management, Mesh, and Seamless Roaming.△
- More Capacity and Wider Coverage: Supports 380+ concurrent clients* and covers up to 1500 ft² (140 ㎡)** for reliable and extensive wireless connectivity.

Product Appearance

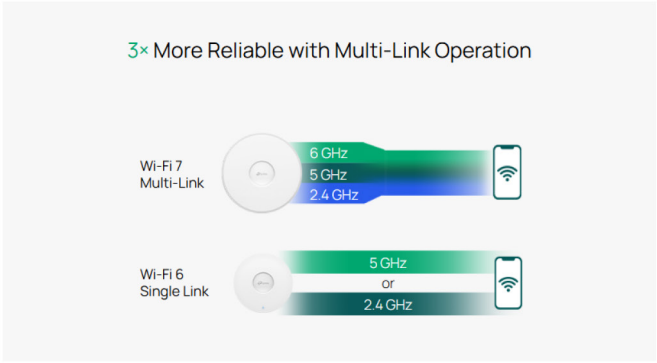


**The actual capacity depends on the wireless environment and client traffic and is generally less than the maximum number of client connections.
§Coverage value is calculated based on laboratory testing. Actual coverage is not guaranteed and will vary as a result of client limitations and environmental factors.

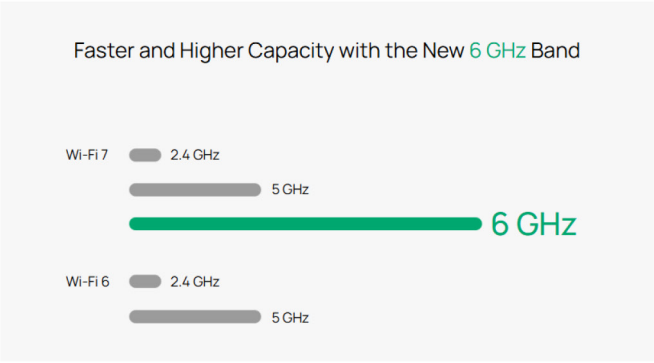
Feature Descriptions

Omada Wi-Fi 7 Technology: Swifter, Smoother, Stronger

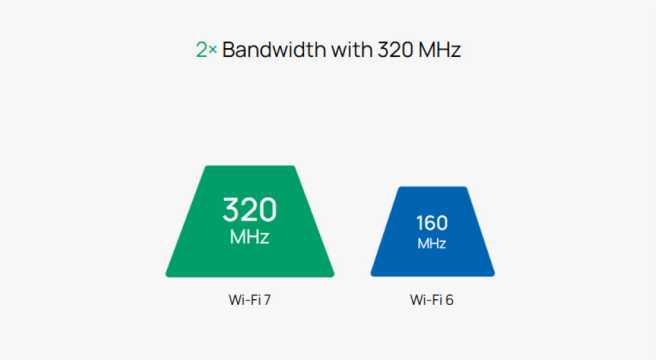
Featuring superb Wi-Fi 7 technologies including Multi-Link Operation, 6 GHz, 320 MHz Bandwidth, 4K-QAM, and Multi-RUs, Omada EAP772 significantly enhances throughput, connection stability, and concurrent capacity, ensuring faster and higher quality connections for more devices.



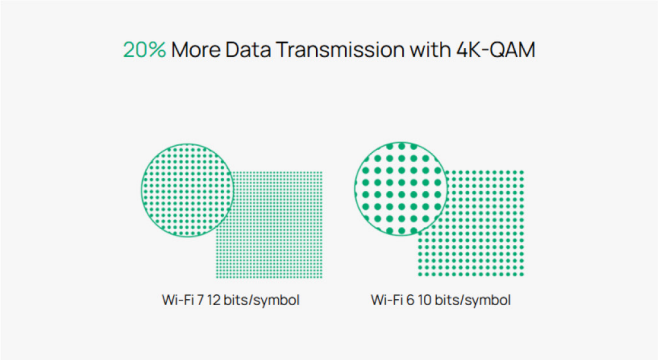
Wi-Fi 6 devices primarily rely on a single link for data transmission. In contrast, Wi-Fi 7 introduces Multi-Link Operation (MLO), enabling devices to utilize multiple links simultaneously, thereby achieving higher throughput, lower latency, and improved reliability.



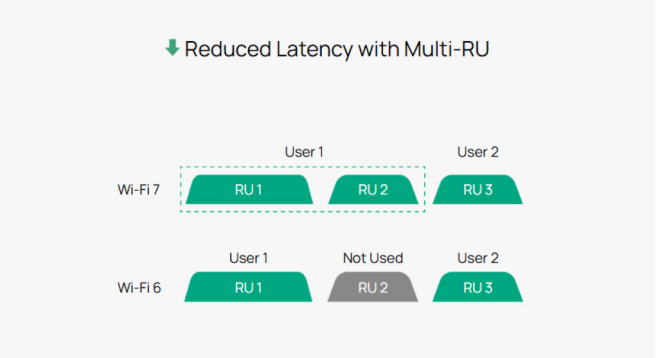
The new 6 GHz band offers a larger spectrum and cleaner channels compared to traditional bands, delivering higher capacity, faster connectivity, and less interference.



With 320 MHz ultra-wide channels, Wi-Fi 7 doubles the bandwidth of Wi-Fi 6's 160 MHz and the number of subcarriers, delivering dramatically higher data transfer rates.



4096-QAM enables each symbol to carry 12 bits instead of 10, increasing theoretical transmission rates by 20% compared to Wi-Fi 6's 1024-QAM. This higher transmission rate boosts data throughput, delivering enhanced speeds and improved network reliability.



Wi-Fi 6 restricts each user to a single resource unit (RU), limiting spectrum flexibility. Wi-Fi 7 overcomes this limitation by allowing multiple RUs to be allocated to a single user and enabling RU aggregation, improving data throughput and spectral efficiency.

Long-Range 6 GHz Coverage with AFC

With AFC support, EAP772 safely accesses additional 6 GHz spectrum, intelligently selecting and managing Wi-Fi channels to reduce interference and maximize spectrum efficiency. This enables stronger signals, wider coverage, and more stable connections in high-demand indoor environments, delivering improved performance for all connected devices.

[#] AFC availability varies by region and country. For supported areas, please visit: https://www.omadanetworks.com/support/faq/4373/

Optimized Wired Performance with 2.5G PoE+ Port

With a 2.5 Gigabit Ethernet Port, EAP772 delivers remarkable multi-gigabit performance for higher bandwidth and faster WiFi. Compatibility with 802.3at PoE is ideal for flexible deployment.

Easy Setup via the Omada App or Web Browser, Powered by SDN.

The SDN supports quickly set up the EAP772 through automatic device identification and one-click adoption. Access convenient configuration and on-the-go management via the Omada app or web browser.

Boosted Network Security

EAP772 offers advanced security features, including a secure guest network with up to 24 SSIDs, SMS login for enhanced business authentication, WPA3 encryption for worry-free open public access, and rogue AP detection, ensuring safer and more reliable network experiences for both guests and business operations.

Cloud-Based Centralized Management

As part of Omada's unified SDN ecosystem, the EAP772 works harmoniously with Omada switches, gateways, and controllers. Businesses gain end-to-end visibility, automated optimization, zero-touch provisioning, and batch configuration— all managed from a single cloud interface.

Specifications

Revision History

Version	Date	Description
V1.0	2025-09-19	Initial release.

AFC availability varies by region and country. For supported areas, please visit: https://www.omadanetworks.com/support/faq/4373/

† Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. The 320 MHz bandwidth is only available on the 6 GHz band. Simultaneously, the 160 MHz and 240 MHz bandwidths or the 320 MHz bandwidth might not be available on the 5 GHz band or the 6 GHz band, respectively, in some regions/countries due to regulatory restrictions. Actual wireless data throughput, wireless coverage, and connected devices are not guaranteed and will vary as a result of internet service provider factors, network conditions, client limitations, and environmental factors, including building materials, obstacles, volume and density of traffic, and client location.

‡ Use of Wi-Fi 7 (802.11be), Wi-Fi 6 (802.11ax), and features including Multi-Link Operation (MLO), 160 MHz Bandwidth, 4K-QAM, Multi-RUs, OFDMA, and MU-MIMO requires clients to also support the corresponding features.

* Coverage value is calculated based on laboratory testing. Actual coverage is not guaranteed and will vary as a result of client limitations and environmental factors.

** The actual capacity depends on the wireless environment and client traffic and is generally less than the maximum number of client connections.

△ Omada Mesh, Seamless Roaming, Captive Portal, and Cloud Access require the use of an Omada controller. Please refer to the User Guides of Omada controllers for configuration methods.

Some models featured in this guide may be unavailable in your country or region. Visit TP-Link website for local sales information: **https://www.omadanetworks.com**. Specifications are subject to change without notice.
