

# **Omada AX3600 Ceiling Mount Wi-Fi 6 Access Point**

Model: EAP660 HD

# Product Overview

The Omada AX3600 Dual-Band Ceiling Mount Access Point EAP660 HD delivers reliable connectivity and enhanced capacity for busy environments. It leverages core Wi-Fi 6 technologies to efficiently manage more simultaneous connections, ensuring a stable and consistent user experience.

- **8-Stream Dual-Band Wi-Fi 6:** 2,402 Mbps on 5 GHz and 1,148 Mbps on 2.4 GHz.<sup>†</sup>
- **High-Density Connectivity:** Up to 1,000+ Concurrent connections in crowded network environments.\*\*
- **1× 2.5G Port:** Ensures fast connectivity throughout the network.
- **Low Latency and Interference:** MU-MIMO, OFDMA, and 1024-QAM ensure high performance for your network.<sup>‡</sup>
- **Flexible Deployment and Easy Setup:** Supports both 802.3at PoE and DC Power supply for flexible installation. Omada SDN for one-click setup.
- **Advanced Features:** Supports centralized cloud management, mesh, and seamless roaming.<sup>^</sup>
- **Wider Coverage:** Covers up to 1500 ft<sup>2</sup> (140 m<sup>2</sup>) for reliable and extensive wireless connectivity.\*

## Product Appearance

\*\*\*The actual capacity depends on the wireless environment and client traffic and is generally less than the maximum number of client connections.

<sup>†</sup>Coverage value is calculated based on laboratory testing. Actual coverage is not guaranteed and will vary as a result of client limitations and environmental factors.

# Feature Descriptions

## Omada Wi-Fi 6 Technology

Wi-Fi 6 (802.11ax) supports up to MU-MIMO, OFDMA, and 1024-QAM, making it an ideal choice for high-performance wireless networks. OFDMA allows multiple devices to share channels efficiently, reducing latency and improving performance in dense environments. MU-MIMO supports more simultaneous device connections, enhancing overall network capacity. 1024-QAM increases data transmission rates, delivering 25% faster speeds compared to Wi-Fi 5.

## Reliable Performance for High-Density Scenes

OFDMA and Uplink/Downlink MU-MIMO provide simultaneous connections for dozens of clients, optimizing network efficiency in high-density deployments. Leverage multi-user capabilities and upgrade your business like never before.

## 2.5G PoE Ports for Optimized Wired Performance

Boost overall network efficiency with a high-performance 2.5G PoE port, delivering blazing-fast data speeds. Compatibility with 802.3at PoE is ideal for flexible deployment.

## Easy Setup via the Omada app, web browser, or SDN

The Omada SDN supports quick setup of EAP660 HD through automatic device identification and one-click adoption. Configure and manage on the go via the Omada app or web browser.

## Boosted Network Security

EAP660 HD offers advanced security features, including a secure guest network with up to 16 SSIDs, SMS login for enhanced business authentication, WPA3 encryption for worry-free open public access, and rogue AP detection, ensuring safer and more reliable network experiences for both guests and business operations.

## Cloud-Based Centralized Management

As part of Omada's unified SDN ecosystem, the EAP660 HD works harmoniously with Omada switches, gateways, and controllers. Businesses gain end-to-end visibility, automated optimization, zero-touch provisioning, and batch configuration— all managed from a single cloud interface.

# Specifications

## Hardware Specifications

# Revision History

| Version | Date       | Description      |
|---------|------------|------------------|
| V1.0    | 2026-02-11 | Initial release. |

<sup>†</sup>Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput, wireless coverage, and connected devices are not guaranteed and will vary as a result of internet service provider factors, network conditions, client limitations, and environmental factors, including building materials, obstacles, volume and density of traffic, and client location.

<sup>‡</sup>Use of Wi-Fi 6 (802.11ax), and features including OFDMA, MU-MIMO, and 1024-QAM requires clients to also support the corresponding features.

<sup>\*</sup>Coverage value is calculated based on laboratory testing. Actual coverage is not guaranteed and will vary as a result of client limitations and environmental factors.

<sup>\*\*</sup>The actual capacity depends on the wireless environment and client traffic and is generally less than the maximum number of client connections.

<sup>△</sup>Omada Mesh, Seamless Roaming, Captive Portal, and Cloud Access require the use of an Omada controller.

Some models featured in this guide may be unavailable in your country or region. Visit TP-Link website for local sales information: <https://www.omadanetworks.com>. Specifications are subject to change without notice.
