

**New Features:**

1. Added support for Personal Edition login, enabling preview, playback, event center, device configuration, device sharing, and video export for LAN-connected devices.
2. Added support for automatic device discovery and manual addition on the Live View and Playback pages.
3. Added support for dragging devices from the device list to the playback panel for quick playback.
4. Supported help and feedback.
5. Added support for synchronized display between the playback toolbar and the playback window.
6. Added support for setting the intelligent playback ratio on the Live View page.
7. Added support for filtering playback timeline segments by Human, Vehicle and Pet detection.
8. Added support for more window layout styles.
9. Added Download Center.

**Enhancements:**

1. Optimized menu interaction, Live View and Playback pages now open by default.
2. Optimized client system settings.
