

New Features:

1. Added support for up to 128 simultaneous live view channels and 8 split-screen layouts on Live View page.
2. Added support for adjusting aspect ratio, with smart scaling enabled by default to display optimal view.
3. When launched, the software opens the Live View and Playback tabs by default, with Live View displayed first.
4. Added support for automatic device discovery, addition, and configuration in Personal Edition for Live View and Playback device lists.
5. Added support for dragging devices from the device list to play panel for instant live view or playback.
6. Added support for custom event-triggered flashing of play windows in Enterprise Edition.
7. Added an operation bar to each play window for individual device operations when in split-screen display mode.
8. Added support for small window electronic zoom preview.
9. Added support for more flexible window layout options.
10. Added a Help & Feedback entry to System Setting page.
11. Added support for S385DPS.

Enhancements:

1. Merged Camera and View lists.

2. Optimized System Setting page.

Bug Fixes:

1. Fixed some known issues.
