

# Release Notes for Navi V1.0.17

## Version Info

This is the first release of Navi.

## Highlight Features

1. Supports importing a Lightlink VPN invite link to quickly establish a secure VPN connection.
2. Supports real-time viewing of connection status, IP addresses, and other information.
3. Supports switching between Split Tunnel (selective routing) and Full Tunnel (full traffic) modes.
4. Supports displaying a list of accessible resources (networks/devices).
