OUR STORY

The smart home market has undergone significant growth in recent years. With Kasa targeting mainstream and high-end consumers, TP-Link has established a new independent brand, Tapo.

For the foreseeable future, Tapo will develop intelligent consumer electronics that allow everyone to adopt a smart home lifestyle at an affordable price. That's why we insist on Tapo being Smart, Secure, and Easy.

Working with its parent company, Tapo takes advantages of its industry awareness and reliable in-house manufacturing to ensure quality.

Millimeter-level Obstacle Avoidance

The Tapo Robot Vacuum navigates around common household objects like cables, slippers, and small items. Structured light sensors provide millimeter-level precision to avoid collisions and tangles, enabling faster and smarter cleaning.

High-Precision Dual Navi System

A LiDAR and Gyro dual navigation system serves as the brain of the Tapo Robot Vacuum and accurately maps out your house in minutes, avoids omissions and repeated cleaning, and even works well in the dark.

No-Fuss Auto Empty

RV30S Plus empties its dustbin automatically after cleaning to keep your hands free. The dock adjusts empty duration according to the cleaning time length of the robot to reduce noise interference. Furthermore, you can set do-not-disturb mode to only clean at night without auto-empty.

Mops and Vacuums Simultaneously

Mopping is essential for houses with hard floors, which need regular polishing. RV30S Plus provides a large 300 ml water tank to cover up to 200 m^2 / 2100 ft^2. Vacuuming and mopping in one trip turns your thankless chore time into me time.
